Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The Examiner conducted a thorough search and was not able to find any prior art which taught the exact details crucial to defining the invention at hand, specifically the combination of the features cited in claims 1 and 10, particularly the features of indicating the instruction either for the NVRAM or for the controller by the pragmatic bit which is accompanied with the instruction, turning either the NVRAM or the controller on/off according to the pragmatic bit and executing the instruction either at the NVRAM or at the controller to control simultaneously the NVRAM and the controller.

#### *Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Park – USPN: 6,851,025 – teaches the use of an identifier which indicates whether an instruction is a cache control instruction or an executable instruction for the CPU.

Nakata – PGPUB: US 2003/0174547 – controlling memory devices using a chip select line.
